

Here you can select a specific date and then view the maximum contracts that have been traded at a specific price.

The screenshot shows a 'volume journal' window with a dark background and yellow text. At the top left is a timestamp '05:55:51'. The title bar reads 'volume journal' with standard window controls on the right. Below the title bar are three buttons: 'setup', 'window', and 'Apply'. The main area contains filter fields: 'Ticker' set to 'GC', 'Type' set to 'MONTH', 'Contract' set to 'DEC17', and 'Date' set to '01/10/2017'. Below these filters is a table with columns '#', 'Date', 'Price', and 'Sum Volume'. A large black redaction box covers the middle column of the table. Three blue arrows originate from the text box above, pointing to the 'Date', 'Contract', and 'Date' filter fields respectively.

#	Date	Price	Sum Volume
1	24/10/2	1277	51734
2	24/10/2	1276.8	46954
3	24/10/2	1277	51734
4	24/10/2	1276.8	46954
5	24/10/2	1277	51734
6	24/10/2	1276.8	46954
7	23/10/2	1276	40912
